

PRESS RELEASE

We are proud to present an innovative novelty: the Secto corner lamp. Too often corners are the gloomy forgotten spaces in the otherwise thoughtfully designed interiors. The Secto corner lamp is here to overcome this challenge by illuminating the corners and transforming the entire interior into a serene entity.

The Secto corner lamp is a perfect solution for narrow corridors, tight staircases, smaller bedrooms or for any other space that deserves to be fully brightened. Thanks to its design it fits perfectly in the corner and can also be seamlessly combined with the rest of the beloved collection. The Secto corner lamp comes in the heights of 45 and 60 cm and in four finishes. Design protection has been applied for it.

Another innovation we are showing is the independent yet modular Kuulto ceiling light. Kuulto has been developed in accordance with customer demand: it is a versatile space saver that can be used both on the ceilings and on the walls. Kuulto works well on its own but thanks to its modular nature it can also be used for creating larger surfaces, rhythmic rows or other creative combinations. It has a high luminosity but turning Kuulto into a mood setter is easy by dimming it.

Secto Design is a Finnish company specializing in hand-made design lamps from high quality PEFC certified birch. The demanding work is carried out by highly talented craftsmen in the factory in Heinola, Finland. All Secto Design lamps are sustainably and ecologically produced. The entire lighting collection that consists of 29 models is designed by the award-winning Finnish architect Seppo Koho. Secto Design lamps are appreciated for their Scandinavian design that is suitable for different styles and interiors.
