Kumulo 5200 pendant lamp

# Enchanting undulation

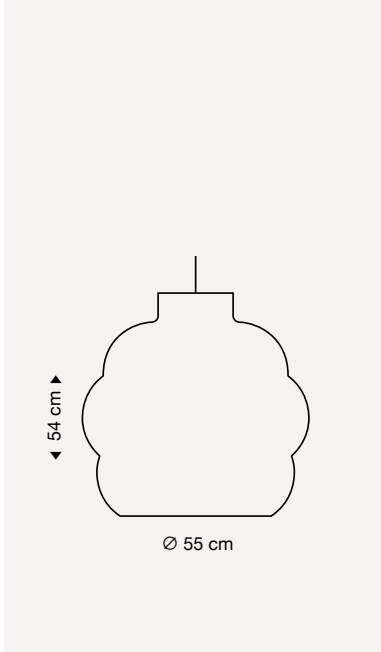

A captivating statement piece inspired by snow-crowned trees and summery cumulus clouds.

Eye-catching, yet lightweight and airy. The idea of the undulating shape of the Kumulo pendant first emerged in designer Seppo Koho's mind during a trip to snowy Lapland and came to life later under a midsummer sky filled with puffy clouds.

"Kumulo can easily become the focal point of a room. It provides a warm, soft light that reflects the shades of the birch wood it is made from", the award-winning designer and architect describes. Like all Secto Design pendants, Kumulo can be used individually, or by combining multiple pieces to create fascinating installations in both private and public interiors.

## Kumulo 5200 pendant lamp

Finishes	Shade	Cable + ceiling cup
	● Natural birch	White
	○ White laminated	White
	● Black laminated	Black
	● Walnut veneer	White

## Secto Design

Secto Design is a Finnish company specialising in premium wooden lighting, handcrafted from birch by skilled craftspeople in Heinola, Finland. Designed by the award-winning architect Seppo Koho, the luminaires and their minimalist elegance draw from the Scandinavian design tradition. Today, the lighting collection comprises 30 distinct models and continues to grow steadily. The natural wooden warmth and the clean, architectonic forms of the lamps create a captivating ambience that enhances various styles and interiors. Approximately 95% of production is exported to over 80 countries, appealing to both private and professional clients.

**Long-lasting quality** lies at the core of Secto Design, together with functionality, clean forms, skilful use of natural materials, and thoughtful details. Sharing the same visual language, the different lamps of the collection can be easily combined to form harmonious continuity throughout the interiors. Their airy appearance comes to life when lit, yet they maintain their grace even with the light turned off.

**Sustainability** is a core principle at Secto Design. The lamps are crafted from locally sourced Finnish birch, a renewable, carbon-binding natural material, and equipped with LED technology for energy efficiency. The company's production practices align with the United Nations Sustainable Development Goals (SDGs) and include a thorough Life Cycle Assessment (LCA) conducted according to EN 15804 standards. The assessment's results support the creation of individual Environmental Product Declarations (EPDs) for each lamp, published in 2025.

**Finnish birch**, known for its strength and resilience, is an ideal material for form-pressed shapes like those of the Secto Design lamps. The birch is sourced from PEFC-certified commercial forests, ensuring ecologically, socially, and economically sustainable forestry practices. The certification also ensures supply chain transparency, allowing the wood to be traced back to its forest of origin.

Every Secto Design lamp is a unique piece that showcases the durability and beauty of Finnish birch, offering a lasting investment that combines exceptional craftsmanship with timeless design.
