

## SECTO DESIGN BRINGS SCANDINAVIAN ELEGANCE TO LIGHT!

**Secto Design, the Finnish company known for its wooden luminaires**, is thrilled to present its iconic collection for the first time at Light! Design Expo, Northern California's premier architectural lighting show.

Light! Design Expo  
June 20, 2024, 11:30AM – 8:00PM  
PIER 27, James R. Herman Cruise Terminal  
The Embarcadero, San Francisco, CA  
Table 51

**Designed by the award-winning architect Seppo Koho**, the Secto Design lighting collection is recognized for its clean, Scandinavian lines, premium quality, and soft light that creates a warm and inviting atmosphere in both private and public interiors.

**The different lamp models share the same visual language** and a compatible, neutral color range, making it easy to combine different shapes and tones to create harmonious continuums throughout the interiors. The lamps can also be used to constitute impressive focal points or captivating installations, that still effortlessly adapt to their surroundings.

**Renowned in the interior design industry**, Secto Design lamps are exported to over 80 countries worldwide. They are carefully handcrafted in the company's own factory in Heinola, Finland, where the innovative use of local PEFC-certified birch meets sustainable production methods.

**The family-owned company** has recently taken its sustainability efforts to a new level by conducting a thorough Life Cycle Assessment (LCA), proving that choosing Secto Design lighting has the desired impact – both aesthetically and environmentally.

**Secto Design's ETL-certified lighting fixtures are stocked in Miami**, from where they can be delivered across the United States.
